Are you looking for a flexible and cost-effective bobbin thread for professional embroidery? Then Madeira Burmilon 120/2 is the obvious choice.

- Backing thread on a cone for self-winding
- Compatible with upper threads from size 12 to 60
- Strong, lint-free and suitable for most embroidery applications

Product description

The standard bobbin thread for professional embroidery

Madeira Burmilon 120/2 is a two-ply polyester bobbin thread developed for professional embroidery production. The thread is supplied on a cone and wound onto bobbins as required, offering great flexibility and making it a popular choice for both small-scale and large-scale production. Burmilon 120/2 works well with most upper threads, including polyester, viscose and metallic threads, and produces even stitches with high production reliability.

For flexible and cost-effective production

For businesses that prefer to wind their own bobbin thread, Burmilon 120/2 offers an economical and versatile solution. Its robust construction ensures stable thread tension and contributes to even embroidery, even during long runs. The thread also has low shrinkage, which helps the embroidery retain its shape after washing and ironing.

Perfect for:

- Polyester threads
- Rayon and viscose threads
- Metal threads
- Corporate and promotional clothing
- Sportswear
- Workwear
- Standard production
- All-round embroidery

High quality for professional production

Burmilon 120/2 is a lint-free and durable bobbin thread used in professional embroidery worldwide. The combination of strength, flexibility and reliable machine performance makes it the obvious standard choice for **in-house winding**. Burmilon 120/2 is available in black and white on 7,500-metre cones.
