- Endless design possibilities – Combine embroidery designs with any text for unique creations.
- Easy editing – Customise and adjust individual letters to create personalised embroidery texts.

Product description

Tajima Software COMPOSER – Create professional embroidery texts with precision

Take your embroidery to the next level with Tajima Software COMPOSER – the ultimate software for advanced text management and editing. With COMPOSER, you can create unique embroidery texts in any shape and font with the highest stitch quality, developed by experienced pattern designers.

Use TrueType fonts and choose between fill stitches and satin stitches to create perfect embroidery texts. Combine ready-made embroidery designs with any text and create endless design possibilities. With over 160 specially designed embroidery fonts and the ability to edit individual letters, you have complete control over your design.

With features such as AutoDigitizer, which automatically calculates the number of stitches for a jpg image, and a realistic 3D preview, you can plan and customise your embroidery projects with maximum precision. COMPOSER is the perfect choice for those who want powerful yet easy-to-use tools for text and embroidery.

Description

- Advanced text handling – Use TrueType fonts in fill or satin stitches for perfect results.
- Endless design possibilities – Combine embroidery designs with any text for unique creations.
- Easy editing – Customise and adjust individual letters to create personalised embroidery texts.
- Smart features – AutoDigitizer gives you a quick estimate of the stitch count for embroidery images.
- Perfect results every time – Preview your embroidery in 3D directly on the garment.
