Tajima Software CREATOR

Category: Software

Tajima Software CREATOR – Create embroidery with precision and creative freedom

Tajima Software CREATOR is the perfect choice for those who want to take their first steps in the embroidery industry or need powerful software to create professional designs. With advanced lettering, stitch editing and outline editing, you have complete control over your embroidery designs, while the programme is easy to use.

- Powerful embroidery design – Create and edit text, logos and designs with precision.
- Advanced stitch management – Change stitch types between satin and various fill types for perfect details.
- Smooth file management – Import vectorised files from Corel Draw without any loss of quality.

Product description

Tajima Software CREATOR – Create embroidery with precision and creative freedom

Tajima Software CREATOR is the perfect choice for those who want to take their first steps in the embroidery industry or need powerful software to create professional designs. With advanced lettering, stitch editing and outliner editing, you get total control over your embroidery designs, while the programme is easy to use.

Create unique company logos, texts and motifs using smart features such as automatic stitching and the ability to import vectorised files from Corel Draw. Adjust density, stretch compensation and stitch angles to ensure that every design is sharp, regardless of size. What's more, you can easily email proofs directly to customers, making your workflow smoother and more professional.

CREATOR is designed to give you maximum creative freedom and perfection in every stitch. Whether you're working on simple logos or more advanced designs, you have the tools to succeed.

Description

- Powerful embroidery design – Create and edit text, logos and patterns with precision.
- Advanced stitch management – Change stitch types between satin and various fill types for perfect details.
- Smooth file management – Import vectorised files from Corel Draw without any loss of quality.
- Efficient proof management – Send finished design proposals to customers directly via email.
- Flexible editing options – Adjust objects by centring, rotating and mirroring.
