

## Product Sheet

### Eastman Buzzaird

**Category:** Cutting machines, Hand-held cutting machines

**Eastman Buzzaird – Powerful and versatile rotary cutting machine**

The Eastman Buzzaird is an air-powered rotary cutting machine designed to handle technical textiles, plastics, leather, rubber and other specialised materials. With its 20,000 RPM pneumatic motor, the Buzzaird is a powerful and durable solution for facilities where electric power is not optimal.

- Air-powered motor – Ideal for environments where electric power is not suitable.
- Versatile cutting – Handles materials such as leather, rubber, plastic and technical textiles.
- Lightweight and manoeuvrable – Weighs only 1.36 kg, reducing operator fatigue.

## Product description

### Eastman Buzzaird – Powerful and versatile rotary cutting machine

The Eastman Buzzaird is an air-powered rotary cutting machine designed to handle technical textiles, plastics, leather, rubber and other specialised materials. With its 20,000 RPM pneumatic motor, the Buzzaird is a powerful and durable solution for facilities where electric power is not optimal.

The machine is ideal for single-layer cutting and is available with several different blade options to maximise cutting efficiency. Its light weight and ergonomic design make it easy to use, while the integrated sharpening function ensures a consistently sharp and precise cut.

### Description

- Air-powered motor – Perfect for environments where electric power is not suitable.
- Versatile cutting – Handles materials such as leather, rubber, plastic and technical textiles.
- Lightweight and manoeuvrable – Weighs only 1.36 kg, reducing operator fatigue.
- Always sharp blade – Built-in sharpening function for continuously sharp cuts.
- Customisable blades – Available with Pelican head, octagon blade and semi-square blade for different cutting applications.

## Technical Specification

| Machine Specifications |                                                                                                                               |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| Engine type            | Pneumatic (air-driven)                                                                                                        |
| Operating pressure:    | 60–90 psi                                                                                                                     |
| Effect                 | 0.33 hp                                                                                                                       |
| Leaf size              | 5.16 cm                                                                                                                       |
| Cutting capacity       | 0.96 cm                                                                                                                       |
| Weight                 | 1.36 kg                                                                                                                       |
| Leaf types             | <ul style="list-style-type: none"><li>• Standard: Semi-square blade</li><li>• Optional: Octagon blade, Pelican head</li></ul> |
