### Caron Bolt laying machine

#### Category: Laying machine

#### Semi-Automatic Laying Machine: Compact and Versatile

Laying machine that combines user-friendliness with high production capacity, making it an excellent choice for all types of fabric on rolls up to 50 kg. The machine is easy to move manually and enables semi-automatic laying, which streamlines your production process.

- Compact Design
- Versatility
- Motorised Cradle

## Product description

### Caron Bolt Laying Machine

Semi-Automatic Laying Machine: Compact and Versatile

Laying machine that combines user-friendliness with high production capacity, making it an excellent choice for all types of fabric on rolls up to 50 kg. The machine is easy to move manually and enables semi-automatic laying, which streamlines your production process.

This machine is the perfect choice for companies that want to optimise their production without compromising on user-friendliness and flexibility.

### Description

- Compact Design: Easy to integrate into your workspace without taking up unnecessary space.
- Versatility: Adapted for different fabric types and rolls.
- Motorised Cradle: Facilitates material loading and unloading, saving time and reducing workload.
