Caron Conveyor

Category: Laying machine

Conveyor table: The ideal solution for efficient material handling

Conveyor tables, combined with an automatic cutting machine, offer an optimal solution for fast and stress-free handling of materials from the laying table to the cutting machine.

- Adjustable legs
- Robust surface
- Optimal leg spacing

Product description

Caron Conveyor Table

Conveyor table: The ideal solution for efficient material handling

Conveyor tables, in combination with an automatic cutting machine, offer an optimal solution for fast and stress-free handling of materials from the laying table to the cutting machine.

The conveyor table combines robustness and functionality, making it an excellent choice for efficient material handling in your production.

Description

- Adjustable legs: Just like the standard table, the conveyor table has adjustable legs that can be adjusted in height.
- Robust surface: The table surface is 3 cm thick and made of melamine-coated fibre, which provides durability and easy cleaning.
- Optimal Leg Spacing: With a leg spacing of only 75 cm and height-adjustable feet, the conveyor table ensures stability and flexibility.

Technical Specification

Machine Specifications	
Width	160 / 180 / 200 / 220 / 240 / 260 / 280 / 300 / 320 / 340 cm
Module length	1.5 m (can be built in any total length)
Leg spacing	75 cm
