

Product Sheet

Caron Flash laying machine

Category: Laying machine

Optimised for precision and flow

Caron Flash is designed to deliver high-quality laying with minimal operator intervention. The automatic feed, combined with the lowest load height on the market, enables quick roll changes and continuous production without interruptions. Its compact format, high flexibility and logical control make Flash an efficient choice in both small and large production environments.

- Lowest load height on the market
- Compact and versatile
- User-friendly design

Product description

Caron Flash – Simplicity meets performance

Flash is the perfect laying machine for those who want a smooth, automated solution without compromising on quality. With the lowest loading height on the market and a user-friendly design, it is equally suited to smaller production runs and high-load environments. Compact but powerful – Flash gives you a more efficient working day and a neater result, every time.

Description

- Lowest load height on the market – for quick roll changes and higher efficiency
- Compact and versatile – perfect for varied production environments
- User-friendly design – minimal learning, maximum control
