

Product Sheet

Caron CPS loader

Category: Material handling

Efficient roll handling – automated precision

CPS is a stand-alone unit that streamlines the transfer of rolls to and from the paver's cradle. The design reduces physical lifting and frees the operator from manual tasks. A well-designed aid for production environments with high demands on precision and safety.

- Automatic loading/unloading
- Fast and safe operation
- Flexible adaptation

Product description

Integrated support in the material flow

The Caron CPS loader increases workflow by automating the lifting of fabric rolls between the floor and the cradle of the laying machine. The platform automatically tilts to the top position, creating a smooth transfer without effort or interruption – a smart and safe solution for efficient textile production.

Compatible with Caron laying machines.

Description

- Automatic loading/unloading – tilting platform that handles rolls up and down without manual intervention
- Fast and safe operation – reduces changeover times and has a built-in stop when encountering obstacles
- Flexible customisation – available in different capacities and heights to match your rolls and systems

Technical Specification

Machine Specifications

Weight	100 / 200 / 300 kg
Useful width	• 160-180 • 200-220 • 240-260 • 280-300 • 320-340
Steering	right side (left side optional)
