

Product Sheet

Caron Titan Loader

Category: Material handling

Compact lifting system for rolls up to 100 kg

Caron Titan is a powerful yet agile loader for York single-layer cradles. With a built-in ramp, automatic tipping and safety system, it simplifies roll handling and improves ergonomics in production.

- Automatic tipping function
- Integrated touchscreen control
- Safe and mobile

Product description

For efficient and safe roll handling

Caron Titan is a compact loader with a single platform that automatically lifts material rolls between the floor and York's single-layer cradle. The platform is concave in shape and equipped with an integrated ramp, making it easy to load rolls with a diameter of up to 60 cm. Titan is controlled directly from the touch screen and is fully integrated with the cradle. Movement is easy thanks to swivel wheels with brakes. Safety features ensure that the platform stops automatically if an obstacle is detected, ensuring safe and efficient operation.

Compatible with York single-layer cradle.

Description

- Automatic tipping function – makes loading and unloading easier
- Integrated touchscreen control – fully synchronised with York cradle
- Safe and mobile – wheels with brakes and obstacle detection

Technical Specification

Machine Specifications	
Useful height	180/220 cm (others on request)
Maximum capacity	100 kg
Maximum roll diameter	60 cm
Steering	right (left optional)
