LaserEvo Mini Laser

Category: Fiber MOPA

Minilaser – Compact marking station with full-size performance

Minilaser combines advanced fibre laser technology with a lightweight and flexible form factor, perfect for confined spaces or mobile workstations. With a motorised Z-axis and access to both 2D and 3D versions, it handles everything from flat surfaces to complex shapes with precision. A versatile and reliable solution for companies that want power in a compact format.

- Advanced fibre laser technology
- Exceptional precision
- Easy to use and versatile

Product description

MiniLaser – Compact, powerful and innovative laser marking

Minilaser is the perfect combination of advanced technology and compact design. This lightweight and versatile benchtop laser is equipped with the latest generation of fibre lasers, offering maximum reliability, minimal maintenance and exceptional marking results.

Despite its size, Minilaser offers powerful performance, with state-of-the-art solutions such as a motorised Z-axis for precise and flexible marking. It is ideal for companies looking for an efficient, durable and easy-to-use laser marking solution. The Mini series is available in both a 2D version – for classic flat marking applications – and a 3D version – for marking curved surfaces and complex profiles.

Description

- Compact and powerful – Small but effective – perfect for companies with limited space.
- Advanced fibre laser technology – High reliability and minimal maintenance for trouble-free operation.
- Exceptional precision – Equipped with a motorised Z-axis for accurate and flexible marking.
- Easy to use and versatile – Perfect for different materials and marking needs.
- Energy efficient and sustainable – Long service life and low operating costs make it a cost-effective investment.
