

Product Sheet

LaserEvo Tabletop model with 3 open sides

Category: Fiber MOPA

LaserEvo Benchtop Model – Compact workstation with full access

The LaserEvo Benchtop Model with three open sides combines safety, flexibility and easy handling in a compact Class 1 solution. The pneumatic door provides easy access to both small and larger objects, while compatibility with our 2D, 3D and MOPA fibre lasers makes it adaptable to a wide range of marking needs. An efficient and safe solution for industrial marking with high demands.

- Maximum access & easy handling
- Safe and compact design
- Flexible laser configuration

Product description

LaserEvo Tabletop model with 3 open sides – Smooth and flexible laser marking

The LaserEvo Tabletop Model with 3 Open Sides is a compact and safe workstation, perfect for efficient laser marking in industrial environments. With Class 1 protection and a pneumatic door that opens on three sides, you get easy access and quick handling of objects to be marked.

This model is compatible with all our 2D or 3D fibre lasers (20W, 30W, 60W) and MOPA solutions, making it adaptable to different materials and production requirements. Thanks to test marking at an early stage, we ensure that you get the optimal laser solution for your needs.

Description

- Maximum access & easy handling – Pneumatic hatch that opens on three sides for quick loading and unloading.
- Safe and compact design – Class 1 safety cabinet for safe operation in industrial environments.
- The systems are fully compatible with our 2D Platinum Line and 3D Diamond Line laser systems – both based on advanced MOPA fiber laser technology for maximum quality and control.
- Efficient production process – Smooth handling ensures fast and accurate marking.
- Tailored to your needs – We carry out test markings to optimise laser selection and settings.
