Heat press Stahls MAXX 2G

Category: Textile printing accessories

Stahls MAXX 2G – Revolutionary heat press for precise and easy fixing
Stahls MAXX 2G is an innovative and easy-to-use heat press that eliminates guesswork and complicated settings. With its uniquely developed dual function, you can easily switch between hard and light press pressure with a simple twist of the wrist – perfect for both pre-treatment curing and post-fixing of DTG-printed garments.

- Dual press pressure function – Easily switch between light and hard pressure.
- Large work surface – 40 x 50 cm with even heat distribution.
- Digital precision – Timer and temperature control for precise settings.

Product description

Stahls MAXX 2G – Revolutionary heat press for precise and easy fixing

Stahls MAXX 2G is an innovative and easy-to-use heat press that eliminates guesswork and complicated settings. With its uniquely developed dual function, you can easily switch between hard and light press pressure with a simple twist of the wrist – perfect for both pre-treatment curing and post-fixing of DTG-printed garments.

The 40 x 50 cm pressing surface and floating heating element ensure even and reliable heat distribution. With a digital timer and temperature control, you always get precise settings, resulting in perfect and long-lasting prints.

Stahl's MAXX 2G has been developed in collaboration with Brother International Corporation to provide maximum performance and user-friendliness. Equipped with a non-stick coating and compatible with interchangeable base plates, it makes your work process both smooth and efficient.

Description

- Dual press function – Easily switch between light and heavy pressure.
- Large work surface – 40 x 50 cm with even heat distribution.
- Digital precision – Timer and temperature control for accurate settings.
- Non-stick surface – Prevents burning and makes cleaning easy.
- Replaceable base plates – Customise the pressing surface for different pressing needs.

Technical Specification

Machine Specifications

Press area	40 x 50 cm
Pressure	Adjustable between hard and light with a knob
Heating element	Liquid for even heat distribution
Temperature & time	Digital timer and heat control
Surface coating	Non-stick coating on both top and bottom plates
Power supply	230V, 50Hz
