Precision and power – Global WF 1335 for professional sewing

The WF 1335 series is ideal for companies that need machines that can handle both precision and efficiency when sewing medium to heavy materials. The series offers flexibility for different needs – from standard machines to fully automated solutions.

- Cylinder arm & walking foot
- Flexibility
- High capacity

Product description

Cylinder arm walking foot machines for professional sewing

The WF 1335 series is designed for professional sewing of medium to heavy materials and combines high precision with flexibility. The machines are equipped with a cylinder arm, needle feed and walking foot, which ensures even transport of the material and consistent, even seams.

- Cylinder arm & walking foot – ensures even feeding and high precision.
- Flexibility – standard, binding-ready, large gripper and automated versions available.
- High capacity – large feed dogs make the machine suitable for thick and heavy materials.
- Automatic functions – thread cutter, reverse tack and presser foot lift (model LH-AUT).
- Reliable and durable – built for professional use and long life.

Available in these models:

WF 1335

- 1-needle cylinder arm machine with needle feed and walking foot
- Equipped with standard hook

WF 1335 B

- Same as WF 1335
- Prepared for edge banding (binder not included)

WF 1335 LH

- Same as WF 1335
- Large gripper for higher wire capacity

WF 1335 B-LH

- Same as WF 1335 B
- Large gripper for higher wire capacity

WF 1335 LH-AUT

- Same as WF 1335 LH
- Electric wire cutter
- Pneumatic presser foot lift
- Reverse tack

Technical Specification

Machine Specifications	
Maximum speed	2400 rpm
Maximum stitch length	6 mm
Press foot lift	7 mm
40% larger coil	For longer distances without interruption
Optional	• Thread cutter • Automatic start and end locking function • Automatic presser foot lift • Extra arm (17/01) for edging work
