Global WF 9205

Category: Industrial sewing machines

Extra powerful walking foot machines for heavy materials
The WF 9205 series is specially designed for professional sewing of very heavy materials such as leather, straps and heavy textiles. The machines are robust, reliable and offer high precision and durability.

- Powerful construction
- Stable long arm design
- Precise sewing

Product description

Global WF 9205 series – Extra powerful walking foot machines for heavy materials

The WF 9205 series is designed for professional sewing of very heavy and demanding materials, such as leather, straps and heavy textiles. The machines combine robust construction with high precision, making them a reliable tool for both industrial use and large, specialised projects.

- Powerful construction – handles extra heavy materials and industrial sewing.
- Stable long-arm design – 65 cm working space for large projects (model WF 9205-65).
- Precise sewing – large barrel shuttle gripper ensures even, strong seams.
- Flexibility – pneumatic presser foot lift and reverse tacking as options.
- Reliable and durable – built for professional use and long life.

Available in these models

WF 9205
This model is an extra powerful cylinder bed machine with a large barrel shuttle gripper, specially designed to handle heavy materials. Optional pneumatic presser foot lift and reverse tacking increase the machine's flexibility and efficiency.

WF 9205-65
The WF 9205-65 is a long-arm cylinder bed machine with the same robust construction and large barrel shuttle gripper. It offers a working space of 65 cm between the needle and frame, making it ideal for large or bulky projects. Pneumatic presser foot lift and reverse tack are also available as options.

The WF 9205 series is the obvious choice for those who need a machine that can handle the toughest sewing projects with both precision and reliability.

Technical Specification

Machine Specifications	
Maximum speed	750 rpm
Maximum stitch length	12 mm
3-transport system	For reliable feeding of heavy materials
Friarm	Facilitates sewing around large or irregular objects
Optional	• Pneumatic presser foot lift • Pneumatic reverse tack
