Global SM 7555

Category: Industrial sewing machines

Specialised machines for professional shoe sewing

The SM 7555 series is designed for efficient sewing of box soles on shoes and boots. With floating horn support and Ho Hsing servo motor, precise sewing around the toe and heel is made easier, and the models are adapted to the needs of different shoe types.

- Precision around the toe and heel
- High productivity
- Flexibility

Product description

Specialised machines for professional shoe sewing

The Global SM 7555 series offers professional machines for shoe manufacturing, especially for sewing box soles on shoes and boots. The machines have floating horn supports that make it easier and more precise to sew around the toe and heel. The series includes several models: SM 7555 for standard shoes and ankle boots, SM 7555 LA with extra-long arm for boots and larger shoes, and SM 7555 NA with small horn for detailed work such as children's shoes. All machines come complete with table, special stand and Ho Hsing servo motor, making them efficient for high daily production.

- Precision around the toe and heel – floating horn support makes sewing easy and accurate.
- High productivity – up to 1,000 pairs per day.
- Flexibility – available with extra-long arm or small horn for different jobs.
- Complete delivery – table, stand and servo motor included.
- Reliable motor – Ho Hsing servo motor for smooth and stable operation

Available in these models:

SM 7555

- 1-needle straight stitch machine for box soles on shoes and ankle boots
- Floating horn support for easy sewing around the toe and heel
- Maximum daily production: 1,000 pairs

SM 7555 LA

- Same as SM 7555
- Extra long arm, suitable for boots and larger shoes

SM 7555 NA

- Same as SM 7555
- Small horn for detailed work, e.g. children's shoes
