Product description

Global COV series

Heavy-duty machines for carpet edging

The COV series is designed for professional carpet and mesh applications. The machines are robust, high quality and offer high performance for overlapping, edging and joining heavy materials.

- High durability – built for heavy carpets and demanding materials.
- Flexibility – available with left-hand head, side knife and various wire configurations.
- Precise edging – side knife and puller ensure smooth and clean edges.
- Special features – for joining carpets before treatment or edging nets.
- Professional choice – reliable performance for industrial use and long service life.

Available in these models:

COV 2502

- 1-needle, 2-thread heavy-duty carpet edging machine

COV 2502 L

- Same as COV 2502
- Left-hand head

COV 2502 SK

- Same as COV 2502
- Equipped with side knife for precise edging

COV 2502 L-SK

- Same as COV 2502 SK
- Left-hand head

COV 2501 SK

- 1-needle, 1-thread machine for joining two carpet sections before special treatment (e.g. bleaching)
- Equipped with side knife

COV 2503 FN

- 1-needle, 3-thread edging machine with puller
- Ideal for edging all types of nets, e.g. sports nets and fishing nets
