Global 3900

Category: Industrial sewing machines

Speed, precision and reliability in one machine

The Global 3900 series offers high-quality 1-needle straight stitch machines for professional sewing.

- High speed & precision
- Direct drive motor system
- Fully automatic lubrication

Product description

Global 3900 Series

Speed, precision and reliability in one machine

The Global 3900 series offers high-quality 1-needle straight stitch machines for professional sewing. With direct drive, fully automatic lubrication and smart features, these machines are designed to deliver maximum efficiency and stitch quality.

- High speed & precision – perfect for industrial sewing with even, durable seams.
- Direct drive motor system – quiet, energy efficient and with full control.
- Fully automatic lubrication – minimises maintenance and extends service life.
- Integrated bobbin winder – always conveniently built into the machine head.
- Smart automation – thread cutter, reverse tack and presser foot lift (optional) for increased productivity.

Available in these models

- 3900 DD – standard model with built-in motor.
- 3900 LH DD – same as above, but with large gripper housing.
- 3900 AUT – complete model with thread cutter and automatic functions.
- 3900 LH AUT – everything in the AUT version, but with a large gripper housing.

Technical Specification

Machine Specifications	
Use	Undermatad, 1-needle straight stitch machine
Max. sewing speed	up to 5,000 stitches/min
Stitch length	max. 5 mm
Presser foot lift height	max. 15 mm
Automatic thread cutter	
Automatic presser foot lift	
Automatic start and end locking function	
Integrated LED lighting
