

Product Sheet

Dürkopp Adler 525i-847-600

Category: Industrial sewing machines

The **Dürkopp Adler 525i-847-600** is the professional sewing machine for sail makers who demand high precision, reliability and a long service life. The machine is specially designed for processing light to medium-weight sail material – such as spinnakers and other sails – with a thickness of up to 5 mm.

- Specialised for sails – perfect for spinnakers and sails up to 5 mm thick.
- High productivity – robust machine built for continuous industrial use.
- Efficient material handling – reliable feeding even in demanding sail materials.

Product description

The Dürkopp Adler 525i-847-600

is the professional sewing machine for sail makers who demand high precision, reliability and long service life. The machine is specially designed to process light to medium-weight sail material – such as spinnakers and other sails – with a thickness of up to 5 mm.

With its robust construction, high capacity and advanced features from the 525i platform, it delivers consistent seams, efficient material handling and smooth production day after day.

- Specialised for sails – perfect for spinnakers and sails up to 5 mm material thickness.
- High productivity – robust machine built for continuous industrial use.
- Efficient material handling – reliable feeding even with demanding sail materials.
- Large bobbins – longer sewing time between bobbin changes, saving time in production.
- Advanced features – automatic thread trimming, presser foot lift and decorative seams with pattern combs.

Technical Specification

Machine Specifications

Material thickness	Up to ≈ 5 mm for sailcloth / light to medium-weight textiles.
Maximum sleep speed	4400 stitches/min
Maximum stitch length	5 mm
Needle system	134
Voltage / power	Approximately 230 V
