

Product Sheet

Dürkopp Adler 888

Category: Industrial sewing machines

M-TYPE ECO postbed machines are the smart solution for those seeking high functionality and flexibility at an attractive price. With their robust construction, powerful **triple feed** system and reliable DAC ECO control, they deliver both precision and efficiency.

- Superior stitch quality
- Reliable feeding of different leather thicknesses
- Flexible use in multiple industries

Product description

M-TYPE ECO postbed machines

The smart solution for those looking for high functionality and flexibility at an attractive price. With their robust construction, powerful **triple feed** system and reliable DAC ECO control, they deliver both precision and efficiency.

Whether for leather shoes, bags, car interiors or other leather products, these machines provide even seams, strong feed and long service life – all in a machine built to perform.

- Excellent seam quality – even, strong seams even in thick or varying leather.
- Triple feed system – combined wheel feed, needle feed and driven presser foot for secure material handling.
- Flexible use – perfect for shoe manufacturing, leather goods and the automotive industry.
- DAC ECO control – smart features such as needle positioning, soft start and easy stitch control.
- Top-class price/performance – reliable machine with professional features at the right price.
