

Product Sheet

Dürkopp Adler 887

Category: Industrial sewing machines

The 887 series takes industrial sewing to a new level of precision, flexibility and efficiency. Optimised sewing kinematics guarantee an even stitch pattern and high sewing quality – even when the speed changes.

- Perfect seam quality
- Time saving
- Gentle material feeding

Product description

887 Series

Takes industrial sewing to a new level of precision, flexibility and efficiency. Optimised sewing kinematics ensure consistent stitch patterns and high seam quality – even at speed changes.

The powerful feed with wheel feed, needle feed and driven presser foot ensures trouble-free handling of different material thicknesses. At the same time, the extra-large XXL hook provides 70% more bobbin capacity, saving time and increasing productivity.

With low noise levels, easy access for maintenance and smart features such as automatic bobbin winding, tool-free needle replacement and fine adjustment of the presser foot position, the 887 is an investment in reliability and top results.

- Perfect seam quality – even and dense stitches even when changing speed.
- Time saving – XXL hook with 70% larger bobbin capacity reduces the number of bobbin changes.
- Gentle fabric feeding – powerful triple feed system with optional rubber coating for mark-free sewing.
- Easy to use – tool-free needle change, smooth thread tension and easy maintenance.
- Quiet and stable operation – minimal vibration for a better working environment.
