Product description

Dürkopp Adler 867 – A State-of-the-Art Single-Needle Machine for Professional Use

The Dürkopp Adler 867 is a high-quality, single-needle flatbed machine that offers precision and efficiency for a wide range of sewing tasks. Equipped with a shuttle stitch and a large bobbin, you get reliable and durable results. It has an extra-large 350 mm clearance, giving you the freedom to work on larger projects without getting stuck.

This machine has a range of features that enhance the user experience:

- Bottom feed and needle feed: To provide perfect fabric movement and ensure an even result, even on difficult-to-handle materials.
- Alternating presser feet: Provides increased flexibility and the ability to adjust to suit different materials and work requirements.
- Alternation adjustment: With a simple knob, you can set the alternation up to 9 mm, giving you extra control over the seam.
- Automatic Functions: Thread trimming, automatic tension adjustment and automatic presser foot control simplify the work and reduce manual labour.
- Ergonomic Design: With a knee switch to increase the alternation and speed reduction, work becomes both more comfortable and more efficient.
