

Product Sheet

Juki PLK

Category: Industrial sewing machines

Juki PLK Series – Programmable sewing with precision
The Juki PLK Series is built for advanced programmable sewing with high speed, precise stitches and energy-efficient operation. Automatic thread tension, real-time error control and a stable material frame ensure even and durable seams. With a quick-adjust presser foot and easy bobbin change, the machine is flexible and efficient for both thin and thick materials.

- Automatic adjustment
- Energy efficient and durable
- Smooth material handling

Product description

JUKI PLK Series – Programmable sewing with maximum precision

The JUKI PLK series offers the latest technology and superior performance in programmable sewing. With JUKI's innovative PLK machines, you get faster, more accurate and more attractive sewing, regardless of material or application.

The machine's automatic setting adjustment ensures optimal thread tension in all sewing directions and identifies errors in real time to minimise production stoppages. Thanks to the advanced material frame, you get perfect pressure on the fabric, resulting in stable stitches right from the first stitch. PLK machines are also energy efficient, helping you reduce your carbon footprint without compromising productivity.

Improved ergonomics and quick-adjust presser foot height make it easier than ever to adapt the machine to different materials and sewing projects. The bobbin cover allows for faster bobbin changes, and thanks to the machine's high sewing speed, you can handle everything from thin to thick materials with ease.

The JUKI PLK series offers the ultimate solution for precision sewing, with technology that ensures stable, high-quality seams every time.

Description

- Automatic adjustment – The machine identifies and corrects setting errors in real time for flawless sewing.
- Energy efficient and sustainable – Lower energy consumption and reduced carbon footprint without compromising performance.
- Smooth material handling – Optimal pressure from the material frames and perfect thread tension in all directions.
- Easy to use – Quickly adjusted presser foot height and easy bobbin case replacement for a smoother workflow.
- High productivity – Efficient sewing at high speed and stable stitch formation right from the first stitch.
