Category: Industrial sewing machines

Industrial sewing machine with free arm – For perfect trouser hemming

Get precise and professional hems on jeans, chinos and work trousers. With bottom, needle and top feed, the machine can handle both thin and thick fabrics. The openable folder makes it easy to use, even for inexperienced operators.

Available in three designs – white, silver and black – and can also be ordered in your own colour or pattern. Already used by brands such as Nudie Jeans, Jeansbolaget, Åhléns and Weekday.

- Perfect for trouser hemming
- Advanced feeding technology
- User-friendly function

Product description

Industrial sewing machine with free arm for trouser hemming

Industrial sewing machine with free arm for trouser hemming – Perfect for jeans, chinos and work trousers

This specialised free arm machine is the ultimate solution for perfect and fast trouser hemming of all types of trousers – from jeans and chinos to work trousers. With bottom, needle and alternating top feed, the machine handles thick and thin fabrics with precision, ensuring professional sewing results every time.

Thanks to the unique openable folder, even an inexperienced operator can quickly achieve accurate and even hems without difficulty. The machine is also ideal for repairs, sewing on labels and other tailoring work, making it a versatile and reliable solution for shops, tailors and studios.

New! Now you can design your own sewing machine and get it in any colour or pattern – create a unique workstation that reflects your brand or concept!

The machine is available in three stylish designs:

- White machine with white table and white stand
- Silver machine with oak table and silver stand
- Black machine with oak table and silver stand

Many well-known brands, such as Nudie Jeans, Jeansbolaget, Åhléns and Weekday, already use this machine in their production, confirming its high-quality performance and reliability.
