Maier 221

Category: Industrial sewing machines

Maier 221 – Blind stitch hemming machine

The Maier 221 is a compact short-arm machine with a jump stitch function for blind stitching. It can handle both thin and thick materials and delivers precise results without vibration, even at high speeds. A reliable choice for professional hemming in garment manufacturing, tailoring and technical textiles.

- Compact and vibration-free design
- Precise stitches even at high speeds
- Extendable work plate for flexible handling

Product description

Maier 221 – Compact hemming machine with jump stitch function

The Maier 221 is a compact, short-arm blind stitch machine equipped with a jump stitch mechanism. The machine is universal and suitable for a wide range of materials, from thin to thick fabrics. Thanks to its stable construction, it operates vibration-free even at high speeds and delivers precise results – perfect for professional hemming in garment manufacturing, tailoring and technical textiles.

Description

- Compact and vibration-free construction
- Precise stitches even at high speeds
- Extendable work plate for flexible handling
- Small cylinder arm – ideal for sleeves, gloves, etc.
- Jump stitch function 1:1 / 1:2 (also 1:3 as an option)
