Juki LH-3500

Category: Industrial sewing machines

JUKI LH-3500A Series – Twin needle performance for demanding production

The JUKI LH-3500A is a high-performance twin needle machine with direct drive and semi-dry technology, designed to deliver smooth, clean seams in both light and heavy materials. With smart thread tension, flexible feeding and micro-lifter function, you get maximum control and high sewing quality – perfect for everything from the fashion industry to technical textiles.

- Direct drive motor
- Semi-dry technology
- Adjustable thread tension

Product description

JUKI LH-3500A Series

The LH-3500A series is JUKI's premium series for two-needle sewing, designed to deliver stable, clean seams even at high speeds. With direct drive, semi-dry technology and advanced thread tension and feed functions, the machine is built for demanding production – whether working with thin or heavy materials. The integrated micro-lifter function and flexible feed make it ideal for both fashion and technical apparel.

Description

- Direct drive motor – less vibration, quieter operation
- Semi-dry technology – minimises oil stains
- Adjustable thread tension – perfect for varying materials
- Micro-lifter – protects delicate fabrics during sewing
- Switch between needle and bottom feed – even seams without wrinkles

Technical Specification

Machine Specifications

• Maximum speed	3,000 stitches/min
• Applications	Light to heavy materials (various types A/F or S/G)
• Oiling	Eco Oil (circulating) or Clean Oil (minimal)
• Lift the presser foot	Fine-tunable via micro-lifter
• Needle bar thread guide	Wire type (A/F) or hole type (S/G)
