Veit HP2003

Category: Pressing equipment

Veit HP 2003 – High-pressure iron with electronic precision

Veit HP 2003 is a professional steam iron with electronic temperature control that provides even and gentle steam. The pointed soleplate allows for precise ironing even in hard-to-reach areas, while the robust construction ensures a long service life. Also available without electronic thermostat.

- Electronically controlled temperature with an exact tolerance of +/- 2°C
- Soft and even steam – perfect for delicate fabrics
- Hardened soleplate with pointed design for optimal access and finish

Product description

Veit HP 2003 – Electronically controlled high-pressure iron for professional precision

The Veit HP 2003 is a high-quality steam iron with electronic temperature control, designed to meet high standards of precision and comfort. The advanced steam system provides gentle and even steam, making it particularly suitable for delicate fabrics. The pointed soleplate allows for precise ironing even in hard-to-reach areas, and the robust construction guarantees a long service life in professional use.

Also available without electronic thermostat.

Description

- Electronically controlled temperature with an exact tolerance of +/- 2°C
- Soft and even steam – perfect for delicate fabrics
- Hardened soleplate with pointed design for optimal access and finish
- Ergonomic VEIT handle with integrated steam button
- Heat and touch protection included as standard

Technical Specification

Machine Specifications	
Temperature control	Electronic, with a maximum tolerance of $\pm 2^{\circ}\text{C}$
Steam capacity	Maximum 3 kg/hour
Steam pressure	3–5 bar
Electrical connection	230 V, single-phase, 50 Hz
Weight	1.3 kg
