#### Primula Perfect PD S+B – Professional ironing board with suction, blowing and heating

Primula Perfect PD S+B is an ergonomic ironing board for professional pressing of various garments. With suction, blowing and heating functions, it gives perfect results, while its design and optional extras make it flexible for tailors and studios.

- Effective results
- Ergonomic design
- Flexible solution

## Product description

### Primula Perfect PD S+B – Professional ironing board with suction, blowing and heating

Primula Perfect PD S+B is the ultimate ironing table for professional pressing and ironing of women's and children's clothing, skirts, dresses and shirts. With integrated suction and blowing functions as well as heat, it provides perfect ironing results while holding the fabric in place for a smooth and efficient work process.

The ironing table is designed for maximum ergonomics and functionality and has an 85 cm high chimney for efficient steam release. To ensure maximum comfort and efficiency, it comes with a hose holder, silicone-coated iron rest, metal catch surface, double kick plate and wheels for easy transport.

For further customisation, the table can be supplemented with a swing arm, sleeve block/egg block, iron hanger, lighting, iron suspension and iron, making it a complete solution for professional textile workshops and tailors.

#### Description

- Effective results – suction, blowing and heating functions for smooth, wrinkle-free garments.
- Ergonomic design – high chimney for steam, wheels for transport and practical details such as hose holder and iron rest.
- Flexible solution – can be supplemented with swing arm, block, hanger, lighting and other accessories.

## Technical Specification

| Machine Specifications |                                                                                                                |
|------------------------|----------------------------------------------------------------------------------------------------------------|
| Workspace              | 120 x 42 cm                                                                                                    |
| Adjustable height      | 78 - 91 cm                                                                                                     |
| Heat capacity          | 1 kW                                                                                                           |
| Suction capacity       | 0.75 HP                                                                                                        |
