Primula ECO VAPOR high-pressure boilers

Category: Pressing equipment

Industrial steam generator – Continuous operation for professional use

A powerful steam generator with electronic control, 20-litre water tank and wheels for easy transport. Available in different models for 1 or more steam irons, perfect for clothing manufacturers, studios and dry cleaners.

- Flexible capacity
- Practical design
- Versatile use

Product description

High-pressure boilers

Industrial steam generator for continuous operation

Available in different models and with connections for one or more steam irons depending on power – from 2.5 kW up to 6 kW. All functions are electronically controlled. Supplied with a 20-litre water tank and a service tank for boiler emptying. Equipped with wheels for easy transport. Suitable for garment manufacturers, dry cleaners, clothing stores and studios. Complement with a high-pressure iron, steam brush, steam finisher or steam gun.

- Flexible capacity – power from 2.5 kW to 6 kW, for one or more irons.
- Practical design – 20-litre tank, service tank for boiler emptying and wheels for mobility.
- Versatile use – can be complemented with a high-pressure iron, steam brush, steam finisher or steam gun.

Technical Specification

Machine Specifications

ECO VAPOR High-pressure boiler for 1 iron

- Steel tank 8,5 l
- Heating capacity 2.5 kW
- Steam capacity 3.25 kg/hour
- Steam pressure 3.5 bar
- 230V 1-phase, 50 Hz
- Drainable water tank

ECO VAPOR High-pressure boiler for 2 irons

- Steel tank 8,5 l
- Heating capacity 6.0 kW
- Steam capacity 7.8 kg/hour
- Steam pressure 3.5 bar
- 400V 3-phase, 50 Hz
- Drainable water tank
