Krafft KF-130-LR

Category: Cutting machines

Krafft KF-130-LR – Efficient and Precise Tape Cutting Machine

The Krafft KF-130-LR is a universal, high-performance tape cutter, ideal for wide tape and Velcro tape. With both hot and cold blades, the machine can seal the edges of the material to prevent fraying and ensure a clean, professional finish.

- Hot and cold cutting
- Flexible width and length
- Intelligent temperature control

Product description

Krafft KF-130-LR – Efficient and Precise Tape Cutting Machine

The Krafft KF-130-LR is a universal, high-performance tape cutter, ideal for wide tape and Velcro tape. With both hot and cold knives, the machine can seal the edges of the material to prevent fraying and ensure a clean and professional finish.

The user-friendly touchscreen panel makes it easy to set the cutting length and speed, while the advanced temperature control ensures perfect cutting of different materials. The KF-130-LR can handle strip cuts up to 200 mm wide or several narrower strips at the same time, making it ideal for companies looking to increase efficiency and improve product quality.

With high accuracy and cutting speed, the machine saves both time and labour, making it a smart investment for professional production.

- Hot and cold cutting – Option to seal material edges during hot cutting.
- Flexible width and length – Cuts strips up to 200 mm wide or several narrow strips simultaneously.
- Intelligent temperature control – Adjustable blade temperature up to 350 °C for optimal adaptation.
- Programmable precision – Ability to save and program cutting length and cuts via touch screen.
- High capacity – Fast production with an average output of 170 pcs/min.

Technical Specification

Machine Specifications	
Maximum temperature	350 °C
Cutting length	Adjustable from 10 to 99,999 mm
Working width of the blade	Up to 200 mm
Output speed	Up to 170 cuts per minute
Energy consumption	0.9 kW
Power supply	230V / 50Hz
Compressed air	Required for optimal function
