TBC-55 LHX Angle Cutter

is an automatic band cutter that cuts bands and straps made of materials such as PP bands, safety belts and parachute belts.

Product description

TBC-55 LHX Angle Cutter

This is an automatic band cutter that cuts bands and straps made of materials such as PP bands, safety belts and parachute belts. The machine uses a hot cutting blade that immediately seals the cut surface and prevents fraying, resulting in a clean and durable cut.

The motor-driven 150 mm rotating hot blade can be adjusted in 1° increments for high precision. The capacity is 16-26 cuts per minute at a length of 1 metre with a maximum width of 140 mm. Powered by AC 110/220 V, 50/60 Hz, it fits easily into various production environments.

Technical Specification

Machine Specifications	
Cutting knife	Warm
Power source	AC110/220V. 50/60Hz
Max. Cutting	Straight: 100 mm, Angled: 70 mm, (45° base)
Lengths	40 mm 300 m
Cutting/min	Length: 50mm): 60 to 70 cuts
Weight of the machine	95 kg net
