

Product Sheet

Veit 2129 – High-pressure iron with stable heat and ergonomics

Veit 2129 is a powerful steam iron with a bimetal thermostat and precise heat control. Ergonomic VEIT handle, fast heating and effective steam make it a reliable tool for both delicate fabrics and high capacity.

- Adjustable thermostat 60–215 °C with ± 15 °C tolerance
- Powerful 900 W heating element for even heat throughout the entire process
- Ergonomic and skin-friendly VEIT handle with integrated steam button

Product description

Veit 2129 – High-pressure iron with stable heat and ergonomic design

Veit 2129 is a powerful steam iron with a bimetal thermostat and precise heat control for professional use. Its robust construction, combined with an ergonomic VEIT handle and effective steam function, makes it a reliable tool for both delicate fabrics and high capacity. Short heating time, even steam and high safety are standard features.

Description

- Adjustable thermostat 60–215 °C with ± 15 °C tolerance
- Powerful 900 W heating element for even heat throughout the entire process
- Ergonomic and skin-friendly VEIT handle with integrated steam button
- Soft steam even at low temperatures – gentle on delicate fabrics
- Heat and steam protection for safe and comfortable use

Technical Specification

Machine Specifications

Temperature control	• Thermostatically controlled, adjustable 60–215°C • Temperature tolerance: ± 15°C
Effect	900 W
Overheating protection	Activated at 275 °C
Steam function	• Maximum steam comfort even at low temperatures • Even steam distribution for professional results
Connection	VEIT connector or square connector – compatible with various steam generators
Weight	Approximately 1.5 kg
