Madeira Luna

Category: Embroidery thread

Madeira Luna – The embroidery thread that glows in the dark

Do you want to create embroidery that really stands out? With Madeira Luna, you get a unique glow-in-the-dark effect that ensures your design remains visible even when the lights go out.

- Glow-in-the-dark effect with a long afterglow
- Soft and comfortable, just like ordinary embroidery thread
- Perfect for children's clothes, sportswear and creative designs

Product description

Embroidery that continues to glow in the dark

Madeira Luna is a special thread that absorbs light and then emits it as a greenish glow in the dark. Thanks to advanced technology, Luna has a significantly longer afterglow than many other luminescent embroidery threads on the market, creating a striking and eye-catching design.

Despite its unique properties, Luna is soft and pleasant to work with and can be embroidered in the same way as a standard size 40 embroidery thread.

Creative effects that catch the eye

Luna is the perfect choice when you want to highlight details or create embroidery with a surprising effect. The thread adds extra expression to the design and is particularly well suited to motifs that need to be visible in both daylight and the dark. The brightness is affected by how much light the thread has absorbed, meaning the effect is at its strongest after exposure to daylight or bright lighting.

Perfect for:

- Children's clothing
- Sports and leisurewear
- Outerwear
- Carnival and party wear
- Event and promotional products
- Decorative details
- Jeans and denim
- Creative and eye-catching embroidery

High quality for professional production

Luna combines a unique visual effect with excellent machine performance and high durability. The thread is resistant to washing, tumble drying and chlorine, making it suitable for garments that are worn and washed regularly. Luna is available on 750-metre spools.
