Madeira Polyneon

Category: Embroidery thread

In the textile industry, polyester is a popular synthetic fibre that is commonly used to manufacture threads and fabrics.

Polyneon is the best choice when you need high durability for embroidery on fabrics that are washed very frequently. Madeira dyes Polyneon using a special technology that gives the thread high resistance to chlorine. This thread is also resistant to sunlight, abrasion and many other chemicals.

Product description

In the textile industry, polyester is a popular synthetic fibre commonly used to manufacture threads and fabrics.

Polyneon embroidery thread is produced using a unique elastic winding method. This ensures flawless embroidery on all embroidery machines at high speeds without looping.

Polyneon is the best choice when you need high durability for embroidery on fabrics that are washed very frequently. Madeira dyes Polyneon using a special technology that gives the thread high resistance to chlorine. This thread is also resistant to sunlight, abrasion and many other chemicals.

Another advantage of Polyneon is its excellent lustre.

Polyneon polyester thread is ideal for embroidery on multicoloured fabrics, sportswear, workwear and children's clothing, swimwear, and restaurant and hotel textiles.

Polyneon embroidery thread is available in 40 count on 1,000 m and 5,000 m spools, in 60 count on 1,500 m and 5,000 m spools, and in 75 count on 2,500 m and 10,000 m spools.
