Madeira Polyneon Green

Category: Embroidery thread

Madeira Polyneon Green – Premium polyester thread for demanding embroidery projects

Do you need an embroidery thread that can withstand frequent washing, heavy wear and harsh environments without losing its colour or lustre? Then Madeira Polyneon Green is the obvious choice.

- High durability for demanding applications
- Resistant to chlorine, sunlight and chemicals
- Made from 100% recycled polyester

Product description

Polyester thread for professional embroidery

Madeira Polyneon Green is a premium polyester embroidery thread developed for applications where durability, wear resistance and a long service life are essential. The thread combines vibrant colours, an elegant sheen and excellent machine performance, making it one of the most reliable choices for professional embroidery. Thanks to Madeira's advanced dyeing technology, Polyneon Green offers very high resistance to chlorine, UV radiation, abrasion and chemicals. The result is embroidery that retains its appearance even after repeated washing and daily use. Polyneon Green is made from 100% recycled polyester from recycled PET bottles, yet offers the same high quality, performance and durability as Madeira's traditional polyester thread.

Developed for demanding environments

Polyneon Green is specially designed for textiles subject to heavy wear and frequent washing. The thread's construction ensures a stable embroidery process with even stitches and minimal thread breaks, even at high machine speeds.

Perfect for:

- Workwear and professional clothing
- Sports and functional clothing
- Teamwear and promotional clothing
- Children's clothing
- Swimwear
- Restaurant and hotel textiles
- Bags and accessories
- Multi-coloured and frequently washed textiles

High quality for professional production

Polyneon Green has been developed for industrial embroidery machines and delivers consistent results even at high production speeds. The combination of durability, colour fastness and reliable machine performance makes Polyneon Green the obvious choice for professional embroidery companies worldwide. Polyneon Green is available in 40-count in 1,000 m and 5,000 m lengths, whilst Polyneon is available in 60- and 75-count in 1,500 m, 2,500 m and 5,000/10,000 m, available only in black and white spools.
