Madeira Firefighter

Category: Embroidery thread

Madeira Fire Fighter Lining – Flame-resistant lining for protective clothing

When safety is paramount, you need a lining that meets the garment's requirements.

- Made from 100% aramid
- Developed for flame-resistant applications
- Perfect when used with Fire Fighter top thread

Product description

An important part of the flame-resistant system

Madeira Fire Fighter Weft is a heat- and flame-resistant weft made from 100% aramid. It is used in garments where the warp, weft and backing all need to meet high safety standards.

Perfect for:

- Firefighters' clothing
- Motorsport
- Protective clothing
- Flame-resistant workwear
- Safety-rated textiles

High quality for professional production

Fire Fighter bobbin thread helps to maintain the safety function of flame-retardant embroidery and is used in conjunction with Fire Fighter top thread and flame-retardant backing. Supplied on cones for **self-winding** in black and white on 5,000-metre cones.
