Madeira Magnetic Core Bobbins

Category: Embroidery thread

Madeira Magnetic Core Bobbins – Premium bobbin thread for long runs

When productivity and reliability are crucial, Magnetic Core Bobbins are the obvious choice.

- More metres of thread per bobbin
- Fewer bobbin changes and less downtime
- Stable thread tension throughout the bobbin's service life

Product description

Pre-wound premium bobbins for high-volume production

Madeira Magnetic Core Bobbins are pre-wound bobbins with a magnetic core, developed for industrial embroidery production. The magnetic core keeps the bobbin stable even when there is little thread remaining, which contributes to even thread feeding and consistent stitch quality.

Ideal for:

- Multi-head machines
- High-volume production
- Long runs
- Branded clothing
- Workwear
- Large production runs

High quality for professional production

Magnetic Core Bobbins are supplied **pre-wound** and ready for immediate use in the machine. The greater amount of yarn per bobbin results in fewer stoppages and higher productivity compared with traditional bobbins.
