Madeira Polyneon Green Bobbin – Recycled bobbin thread for sustainable embroidery

Do you want to create a more sustainable embroidery project, from front to back? Then Polyneon Green Bobbin is the natural choice.

- High durability and long service life
- Chlorine, UV and chemical resistant
- Made from 100% recycled polyester

Product description

The bobbin thread for sustainable collections

Polyneon Green Bobbin is a bobbin thread made from 100% recycled polyester and developed to complement the Polyneon Green top thread. This combination makes it possible to create embroidery using recycled material throughout the entire design. The thread offers the same high quality and machine performance as professional polyester bobbin threads, whilst contributing to a more sustainable end result.

Perfect for:

- Sustainable collections
- Workwear
- Sportswear
- Denim
- Swimwear
- Promotional clothing
- Polyneon Green embroidery

High quality for professional production

Polyneon Green Bobbin ensures consistent thread tension and even stitches in industrial production. The thread is supplied on cones for **self-winding** and is available in 7,500-metre cones.
