Madeira Burmilon 300 – Extra-fine bobbin thread for premium embroidery

When the focus is on intricate detail, comfort and an exclusive finish, Madeira Burmilon 300 is the perfect choice.

- Madeira's finest premium bobbin thread
- More stitches between each bobbin change
- Soft and flat reverse side for high comfort

Product description

The premium bobbin thread for demanding embroidery projects

Madeira Burmilon 300 is a very fine polyester bobbin thread developed for embroidery where both appearance and comfort are crucial. Thanks to its fine construction, more thread fits on each bobbin, reducing the number of bobbin changes and increasing productivity. The fine thread also produces a flatter and softer reverse side, making it particularly suitable for garments worn close to the skin.

Perfect for:

- Premium embroidery
- Fashion and designer garments
- Sportswear
- Lightweight fabrics
- Dense designs
- Children's and baby clothing
- Garments worn next to the skin

High quality for professional production

Burmilon 300 is a lint-free polyester filament thread that delivers even stitches and high machine performance. It is supplied on cones for **self-winding** and is available in 10,000-metre cones.
